CANADIAN CLASSIC MG CLUB

COX MEMORIAL WHIMPER WONDERLAND RUN MONDAY, JANUARY 1ST, 2024

CCMGC members, Tony and Judy Cox, loved to drive their blue 1962 MGA Mk II with the top down. In fact, they very rarely put the roof up. More than ten years ago They came up with the idea that classic cars should have a drive on New Year's Day. Initially this was an unofficial Club event, and members from the LAMB Club, and the Old English Car Club, were invited as Tony was also a member of those Clubs.

So, the event has, in addition to MGs and Jaguars, seen Triumphs, Morgans, Jensens, and Minis participate. Drivers are encouraged to drive with the top down, and this has resulted in some weird and wonderful headgear being employed to keep the brain from freezing. The event goes rain or shine, and even if there is frost in the trees. A hearty pub lunch is available to participants at the end of the one-hour run. The event has been cancelled only twice due to heavy snow on the roads.

This year's event will start at around 11am from the Chevron Station, at 8th Avenue and 176th Street (Highway 15), in South Surrey. Drivers gather from about 10.30am to inspect the various hats worn, and there is a prize for the best hat, chosen by the organisers. There is also a prize for the winning couple at the motoring themed pub quiz. Unfortunately, Tony passed away about two years ago, and his wife Judy passed away earlier this year.

Preregistration is required to allow us to give a number to the pub, so please email Anne Tilbury on eeaytee@gmail.com, indicating make and model of your car, and the number of people for lunch. If you need more information, please contact Peter Tilbury on **604.889.5067**, by text or phone call.

**Doreen Newby in busby, and
Ian Newby in jaguar flying
helmet, prepare to blow away the
New Year's Day cobwebs**

SAVE ETHANOL-FREE GAS!

The Federal Government has mandated that all grades of gasoline sold at the pumps in Canada must be an ethanol blend by December 31 of this year.

The National Association of Automobile Clubs of Canada has pointed out that ethanol can damage fuel tanks in older vehicles, as well as other system components such as rubber parts and carburetors. The process can be accelerated if the vehicle is not driven frequently. NAACC has asked the Federal Government to allow Chevron 94 and Shell 91 to remain ethanol-free, or at the very least, have a one percent addition for compliance requirements. They are asking owners of older cars to write their MPs to support the campaign to save ethanol-free gas.

CXKJR/CCMGC is a member of the Specialty Vehicle Association of BC. The SVABC is encouraging classic car owners and enthusiasts to write their MPs to support the NAACC proposal. To find the address of your MP, go to:

<https://www.ourcommons.ca/members/en/addresses>

You can write your own letter or use wording such as the following;

Dear John or Jane Doe, MP

Classic car owners no longer have access to pure gasoline in Canada, given the Federal Government's mandate that all grades of gas must contain ethanol by December 31, 2023. Since ethanol can damage fuel tanks in older vehicles and other fuel system components such as rubber parts and carburetors, the National Association of Car Clubs of Canada has asked the Federal Government to allow Chevron 94 and Shell 91 to remain ethanol-free, or alternatively, to have a one percent addition for compliance requirements.

As a classic car owner, I am seriously concerned about losing the opportunity to use ethanol-free gas in my car. I am therefore asking for your support of the NAACC proposal, to allow ethanol-free gas to be available again across Canada.

Your support of this would be greatly appreciated.
